TAMUWake Making Database Backups

Author: Nathan Wilke

People Involved: App's Current Owner

Viewing Permissions: Admin

Purpose: It is always smart to periodically make backups of your database. This ensures that even in the event of the application failing, the data is preserved, and can later be reintegrated into the application.

Instructions:
1. **Connect to Heroku via terminal**
   a. https://devcenter.heroku.com/articles/quick-start-heroku-connect-cli
   b. Connect to Heroku application currently found at https://dashboard.heroku.com/apps
2. **Export Data**
   a. Log on to Heroku via terminal
   b. Use commands found at https://devcenter.heroku.com/articles/heroku-postgres-import-export to export data
3. **Import Data**
   a. Log on to Heroku via terminal
   b. Use commands found at https://devcenter.heroku.com/articles/heroku-postgres-import-export to import data
